**\* % OF REWIPES TAKEN** - At the end of the project a dust test is done for occupant safety. When a contractor leaves too much leaded dust behind, (measured by lab analysis) he must return to the property for a second cleaning on surfaces where he failed the dust test. The inspector also returns to the site to take more samples to confirm safety.

**\*PERMIT EXTENSIONS** - Extra time given to contractor to complete the project (ORIGINAL ALOTTED TIME is 2 WEEKS).
